*Industrial Strength Communications*

**PC/104 Products**

CTI offers a variety of reliable, high performance PC/104 and PC/104-Plus products for your industrial and embedded needs. Our products include; multi-port serial boards (2, 4, 8, or 12 ports with 9-bit data and synchronous options), Reconfigurable FPGAs (Virtex-5 or Spartan-3E), wireless radio modems (900MHz or 2.4GHz FHSS technology), solid state drives (driverless operation with 4, 8, 16, or 32 GB storage), CAN controller cards (featuring two industry standard NXP SJA1000 CAN controllers), and engineering tools.

To ensure your applications are protected from disruptions that can occur from harsh environments or conditions, CTI provides industrial temperature range, surge suppression and optical or electrical isolation options. Ask us about customization.

**FEATURES**

- › PC/104, PC/104-Plus and PCI-104 form factors
- › Perfect for industrial and embedded applications where speed, accuracy, and reliability are critical
- › Optical isolation, electrical isolation, surge suppression and industrial temperature range suppression options
- › Customization options include; connectors, baud rates, software, or complete board redesigns
- › Engineering tools also available to operate PC/104 modules in standard PCI and ISA systems and MiniPCI cards in PC/104-Plus stacks. Lifetime warranty, free technical support, RoHS compliant
