6U VME PowerPC Single Board Computer

The PowerEngine7 features the latest PowerPC 750FX/GX microprocessor from IBM, which delivers 700 MHz to 1 GHz performance for networking, storage, imaging, and other high-performance embedded applications. The PowerPC 750FX/GX fully complies with the PowerPC architecture. It is the first to combine IBM's most advanced process technologies onto one chip, reducing power consumption by up to 50 percent or increasing performance by up to 30 percent.

**kontron****FEATURES**

- › Single or Dual PowerPC 750GX/FX at up to 1 GHz
- › VME 2eSST Capability
- › Very Low Power Dissipation
- › Available in 4 Environmental Ruggedization Levels
